## Inputting Scores by Team Personnel

Any Team Personnel can now input their own game scores! **This new features is disabled by default but can easily be enabled from your Team Directory Settings.**

If this feature is not available to you, you will need to contact the admin from your club to enable this. For information on how to enable, [Click Here](#).

## Inputting Scores

To input your score, navigate to your team page and click the **Calendar** tab. On the calendar page, click on **Results**.

A screenshot of a web application interface for a team's calendar. At the top, there is a navigation bar with tabs: HOME, ROSTER, CALENDAR (which is highlighted with a grey background), NEWS, GALLERY, and DISCUSSIONS. Below this is a secondary navigation bar with buttons: Agenda, Week, Month, Task Sign Up, Results (highlighted with a grey background), and Create Event. On the right side of this bar is a button with a download icon and the text "Export this Calendar Feed". Below the navigation bars is a section titled "Team Results" in a dark grey header. The main content area shows a single result entry for the date "08-07-2016". To the left of the date is a small house icon and the word "Green". In the center, the score "5 - 7" is displayed in large, bold numbers. To the right of the score is the word "Black". At the bottom of the entry are two buttons: "Edit Scores" (highlighted with a grey background) and "View Event".

Team Personnel will have access to input the final score for only their home games. They can input player points for both home and away games after the final score has been posted.
